## EDUCATION

**SITAMS, Jntua University Anantapur**

*MCA - Master of Computer Application - CGPA - 7.9*

**2021 – 2023**

*Chittoor, Andhra Pradesh*

## EXPERIENCE

**Software Engineer at I Base Software Solutions India Pvt. Ltd.**

**April 2025 - Present**

*Role - Java Developer*

*Madapur, Hyderabad*

- Performed **business client setup**, including configuration of products, workflows, and country-specific policy rules.
- Implemented a **bulk policy upload feature** to enable automatic creation of multiple policies through file upload, involving complex validation, data processing, and business rule implementation for dealer transactions
- Developed and implemented business logic for **policy creation, validation, and claims processing** based on country-specific requirements.
- Collaborated with **cross-functional teams** (QA, Business, and Support) to deliver enhancements, change requests, and bug fixes.
- Resolved **Production and UAT issues** related to policy and claim processing by analyzing application logs, identifying root causes, and implementing fixes .
- Used **Git** for version control, including code commits, branching, merging, and maintaining source code in a collaborative development environment.
- Developed and tested **REST APIs** and performed API validation using **Postman** for request-response testing and troubleshooting.

## PROJECTS

**Danni – Insurance Policy & Claims System — QBE Insurance Group**

**2025-2026**

- Worked on a global **B2B insurance platform** that enables dealers and business partners to issue policies and process claims for multiple products such as Warranty (MBI), GAP, SMART, Recovery, and MOT.
- The application supports **policy lifecycle management**, including policy issuance, renewals, and claims processing.
- Designed to operate across **15+ countries and 50+ business clients**, handling region-specific configurations and business rules.
- Supports both **direct dealer policy issuance and third-party reseller onboarding**, allowing partners to sell insurance on behalf of QBE.

**web-based Employee Management System Application.** | [Spring Boot](#), [JPA](#), [MySQL](#)

**Jan 2025**

- Developed a web-based Employee Management System using **Spring Boot, Spring MVC, Spring Data JPA, and MySQL** to manage employee information efficiently.
- Implemented core functionalities including **CRUD operations, dynamic search, pagination, and soft deletion**.
- Built the user interface using **JSP, JSTL, and Bootstrap** for better usability and responsiveness.
- Applied the **PRG (Post-Redirect-Get) pattern** to prevent duplicate form submissions and maintain data consistency.

## TECHNICAL SKILLS

**Programing Languages:** Java, JavaScript, SQL.

**Technologies/Frameworks:** SpringBoot, Hibernate, HTML, CSS, MongoDB.

**Databases:** Oracle, Mysql, SQL Server.

**Developer Tools:** Eclipse/STS, Gradle, VS Code, IntelliJ, Postman, Git.
